

Insta Berm - 10' X 10' X 6" Arctic or Chem-Shield

Overview

Guard against toxic spillage with the Insta-Berm (L-Rod), a fully collapsible, rapidly deployable berm made from chemical-resistant materials. Constructed from industrial-strength fabric, it is an easy-to-install environmental safeguard that allows companies to meet today's strict guidelines.

Designed to provide secondary containment under fuel tanks and drums, this Insta-Berm model uses L-rods inside fabric pockets to provide support. Durable and reliable, use it virtually anywhere for secondary containment or storage of toxic materials

Features & Benefits

- * L-shaped rods hold up walls, yet fold down easily for entry and exit
- * Constructed of durable Chem-Shield fabric or extreme temperature-proof Arctic-Shield fabric (resistant to -50 degrees F/-46 C). Arctic-Shield fabric is fully certified by Intertek to meet the CAN/ULC-S668-12 standard for liners. This standard is listed in the Storage Tank Systems for Petroleum Products and Allied Petroleum Products Regulations (SOR/2008-197), under the Canadian Environmental Protection Act, 1999.
- * Fully collapsible for compact storage and easy transport
- * Wall design allows vehicles or mobile equipment to be driven in and out of the berm
- * Helps companies avoid stiff penalties from non-compliance of EPA standards
- * Instant deployment without any tools
- * Wide range of sizes available, plus custom-made sizes
- * Can be easily cleaned, folded and stored for reuse
- * Very cost efficient compared to air-inflated models
- * Appropriate for waste water, petroleum products and various other chemicals
