

»» Wire Bracket Berms (Economy)

Our most economical berm solution constructed in LDPE. (Low Density Polyethylene)

Wire Bracket Berm

The Wire Bracket Berm is our most affordable berm system. The berm utilizes sturdy galvanized steel wire brackets that pinch & slide into the sidewall pockets. The wire brackets are a low cost and superior alternative to traditional L brackets from ease of installation to providing secure side wall support. The Wire Bracket berm is constructed of LDPE fabric that is tough enough to drive on and has walls sturdy enough to contain any liquid or spill. The LDPE fabric material is resistant to UV, chemical and most acids (see fabric specifications data sheet). The Wire Bracket Berm system is an easy solution for complying with complex governmental and environmental regulations and worker safety requirements.

Advantages

- Low-cost and appropriate for lower budgets
- Lightweight, heavy-gauge steel brackets
- Easy to set up, maintain and dismantle
- Most common and widely used spill containment in many industries
